

Asymmetrical Horn TP Antenna

HORN ANTENNA WITH TWISTPORT[™] CONNECTOR

Asymmetrical Horn TP Antenna combines the best of both worlds - high gain of a traditional sector antenna and zero side lobes of a horn. Its radiation pattern is wide in azimuthal and narrow in elevation plane, greatly improving coverage planning options. Asymmetrical Horn TP Antenna exceeds the traditional patch sector antenna thanks to high stability of gain and radiation pattern in the whole band of operation. Outstanding noise rejection and precision of radiation pattern favors Asymmetrical Horn TP antenna for high-density AP clusters, in sprasely populated areas and dense co-location sites.

Asymmetrical Horn TP Antenna features our revolutionary TwistPort[™] connector - a patentpending twist-and-lock waveguide port. TwistPort[™] is virtually lossless and embodies a complete shift of paradigm in wireless network scalability and convenience of deployment. Asymmetrical Horn TP Antenna supports a wide range of third party mainstream radios with our TPA TwistPort[™] Adaptor.

TECHNICAL DATA

PERFORMANCE Frequency Range

Azimuth Beam Width -3 dB

Elevation Beam Width -3 dB Azimuth Beam Width -6 dB

Elevation Beam Width -6 dB

Gain

Antenna Connection	TwistPort™ - Quick Locking Waveguide Port
Antenna Type	Horn
Materials	UV Resistant ABS Plastic, Polycarbonate, HDPE, Aluminium, Stainless Steel
Enviromental	IP55
Pole Mounting Diameter	22-80 mm
Temperature	-35°C to +55°C (-31°F to +131°F)
Wind Survival	160 km/hour
Mechanical Tilt	± 25°
Weight	6.5 Kg / 14.3 lbs – single unit* 7.0 Kg / 15.4 lbs – single unit incl. package*
Single Unit	Retail Box: 41.2 × 40.0 × 40.0 cm*
